

## REAL-TIME MOBILE FIELD COLLECTION - EVEN OFFLINE OR IN THE MOST REMOTE LOCATIONS

Boundless Anywhere™ is a mobile mapping app for iOS and Android that allows enterprises to extend the value of the Boundless Exchange™ content management system into the field. Anywhere users collect and maintain vector data and imagery using Apple or Android mobile devices, and can sync data instantly with Boundless Exchange as the central point of collection. Exchange then is able to publish and extend that location information throughout the applications served by the broader enterprise. These capabilities can provide real-time access to location-based data throughout the entire organization.

With Boundless Anywhere, teams can simplify field collection workflows and ground-truth geospatial data to improve the accuracy of spatial information in an enterprise. Engage with a community, validate data, make observations, respond, and communicate while on the move, mobilizing your workforce into field collectors who can enrich the quality of your GIS data and share it in real time. Boundless Anywhere can transform field collection work for applications in asset management, law enforcement, agriculture, utilities, insurance, and all levels of government.

### MOBILIZE YOUR WORKFORCE FROM THE OFFICE INTO THE FIELD

Use Anywhere to mobilize your workforce to collect imagery and data, increasing the availability, richness and value of your location data to make better business decisions. Build a base of data and imagery to better manage field asset inventory, ground-truth an existing GIS dataset, or respond to changing conditions and events as they unfold.

### INCREASE EFFICIENCY

View location data edits and submissions from Anywhere within the powerful Boundless Exchange system, where other business stakeholders can analyze and share field-collected findings with the rest of the organization. Collaborate in real time to make faster decisions for mapping, analysis, and reporting.

### MINIMIZE DOWNTIME

Because a good network connection is never guaranteed in the field, Boundless Anywhere enables users to edit GIS data in even the most remote areas. Edits made while users are disconnected are saved on the mobile device in a database, and changes can be synced when a connection is restored.

### SIMPLIFIED COLLECTION EXPERIENCE

Anywhere features a straightforward, easy-to-use interface, allowing users to capture and submit large amounts of information quickly. Anywhere incorporates basemaps from Mapbox, which provide quick draw times and smooth, attractive rendering; these visually stunning basemaps set a high standard of quality for enabling field teams to aggregate location information.

### MODERNIZE AND REDUCE COSTS

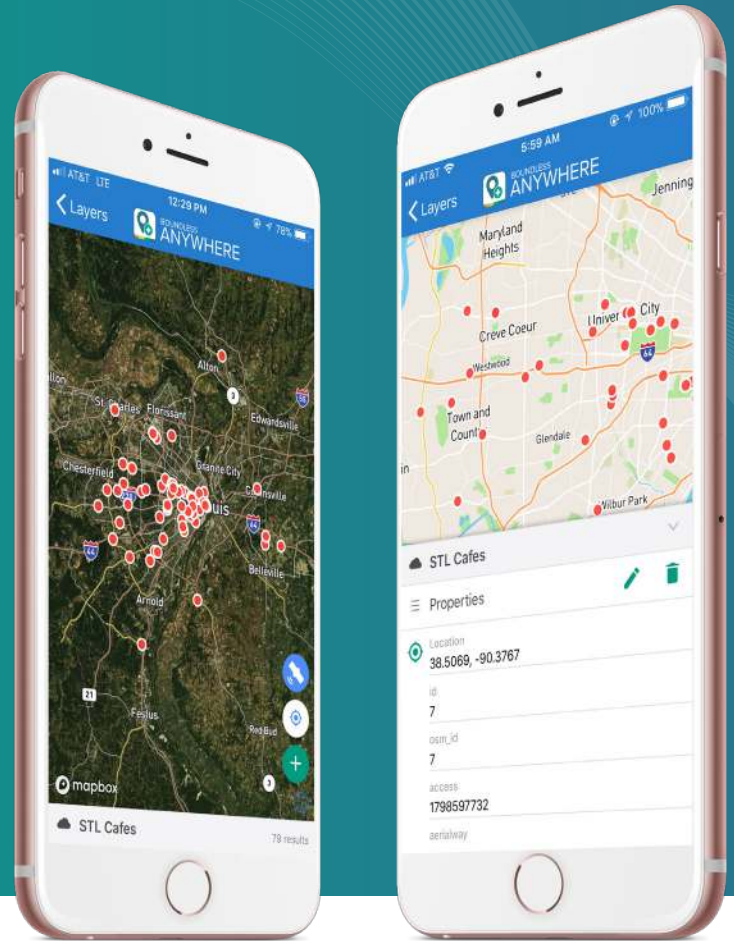

Mobile workflows upgrade your field collection from clipboards and cameras, allowing easy capture, collection, and transmission of critical data and images. This helps you reduce transcription errors, ensuring data collected on-location is current and accurate.

## ENTERPRISE APPLICATION SUPPORT

Boundless Anywhere either works out-of-the box or can be used as a reference implementation for a custom enterprise field collection solution. Our engineering and professional services teams are available to help customize to your specific requirement.

Anywhere is a component of Boundless Exchange and is licensed together as an annual subscription, which contains access and use of the software, support and upgrades. Anywhere is compatible with Exchange version 1.4 and higher. It deploys on devices with iOS 8.X or higher and Android 5.0 or higher. Exchange and Anywhere are licensed via annual subscription from Boundless.

Boundless customers also have access to Boundless Connect, which is our web portal designed to provide documentation, training, help, and user collaboration for our products and services.

### FEATURES

#### Configuration

- Direct integration with Boundless Exchange version 1.4 and later
- Configure the Boundless Exchange endpoint from the Anywhere app

#### Authentication

- Login using Boundless Exchange username/password

#### Map Rendering and Styling

- Premium Mapbox GL basemap
- Supports Mapbox style paint spec

### RESOURCES

#### Availability

Boundless Anywhere is available now on iOS and Android. For more information and details on pricing, email [contact@boundlessgeo.com](mailto:contact@boundlessgeo.com)

### ABOUT BOUNDLESS

Boundless is the leader in open, scalable enterprise-grade GIS software. Boundless empowers state and local governments, federal agencies and commercial enterprises to control the development of their GIS ecosystems and unlock the value of their location-based data to make better decisions, answer location intelligence questions and more fully understand their world. The experts at Boundless reduce the cost and time of deploying, managing and enriching the use of geospatial software with scalable, open GIS solutions – including Server™, Offline Tile Server™, Exchange™, Anywhere™, Desktop™, and Connect™.
