

## AS A MANAGED SERVICE

### SERVING MAPS FROM A HOSTED CLOUD

Serve your maps to your apps like never before when you take advantage of the industry's most reliable and capable open map server coupled with the power and cost-effectiveness of today's cloud environment – all brought to you and managed by the leader in open GIS solutions. With Boundless Server Enterprise as a managed cloud service, just log in and start mapping.

Managed service users have access to Boundless' cloud-native Enterprise edition of Boundless Server. Boundless Server Enterprise features a flexible, scalable architecture that enables organizations to reliably publish a range of data and workflows to web apps, desktop clients, or mobile devices. Organizations can edit and manage the flow of location data through a number of OGC services and open formats.

If you're challenged by limited staff or infrastructure, or lack the expertise to set up and maintain a GIS map server, Boundless Server Enterprise managed by Boundless is the fastest and easiest way to get started. Focus on business outcomes and let Boundless host your GIS server in the cloud – our experts ensure your Boundless Server Enterprise instance is configured properly and running at its fullest potential, no matter how your demand changes.

### BENEFITS

#### Take Advantage of the Cloud

Managed service users benefit from modern cloud IT infrastructure, including simplified start-up and maintenance with access to the latest hardware and software environments, on-demand resource allocation for increased reliability, security and high availability, and backup and failover protection – all managed by Boundless.

#### Scale to Meet Demand

Boundless Server Enterprise as a managed service provides the ability to dynamically and elastically scale resources. As demand changes over time, or spikes unpredictably, Boundless Server Enterprise automatically scales, delivering increased performance and high availability. If demand decreases, resources are released.

#### Minimize Operating Costs while Maximizing Experience

Lower your total operating costs with minimal investment in infrastructure, low ongoing operational expenses, pay-as-you-use, and on-demand elastic scaling. Get the availability and performance you expect, but pay for only what you need, when you need it.

## FEATURES:

- Reliability, performance, and security of the cloud
- Cloud-based, pre-configured instance of Boundless Server Enterprise with a PostGIS service
- Access for unlimited users and compute node auto-scaling
- Ongoing account monitoring and usage logs
- Access to Boundless technical support

## SUPPORT

Boundless Server Enterprise as a managed cloud service is available through an annual subscription from Boundless which includes software, your place in the cloud, premium technical support, best practices and basic implementation assistance, as well as software upgrades, patches, and bug fixes.

With commercial support and maintenance, Boundless Server combines the flexibility of open source with the reliability and support of a single, stable vendor.

## AVAILABILITY

Boundless Server Enterprise as a managed cloud service is available now. For more information and details on pricing, email [contact@boundlessgeo.com](mailto:contact@boundlessgeo.com).

## ABOUT BOUNDLESS

Boundless is the leader in open, scalable enterprise-grade GIS software. Boundless empowers state and local governments, federal agencies and commercial enterprises to control the development of their GIS ecosystems and unlock the value of their location-based data to make better decisions, answer location intelligence questions and more fully understand their world. The experts at Boundless reduce the cost and time of deploying, managing and enriching the use of geospatial software with scalable, open GIS solutions – including Server™, Exchange™, Offline Tile Server™, Anywhere™, Desktop™, and Connect™.
